

CONCRETE PAD OPTIONS: **FLUSH MOUNT KITS**

When installing a building on a concrete surface, the typical minimum requirement is to have a 2" perimeter (or greater) around the structure. Flush Mount Kits allow cement pads to be the exact width and length of the building without the 2" perimeter requirement.

WITHOUT FLUSH MOUNT KIT

WITH FLUSH MOUNT KIT

Flush Mount Kits allow your concrete pad to be the same size as your buildings without the need for an extra 2" around the perimeter of the building.
